Gemba

The Workplace

Gemba refers to the physical place where work is done - the factory floor, the office cubicles, the hospital wards. It's the place where value is created for the customer.

The Mindset

Gemba is a way of thinking and a mindset. It's about going to the source of problems, and seeking to understand the work in progress. It's about respecting the people who do the work and empowering them to make improvements.

The Tools

Gemba relies on a set of tools such as observation sheets, value stream maps, and root cause analysis. These tools help to gather data, analyze it, and make informed decisions about what needs to be improved.
